

# BIORHYTHMS

## MONTHLY

April 5, 2007  
Volume 1: Issue 5

### Important News and Upcoming Events

#### *BioSEPC Elections*

The BioSEPC is looking for three new members! In order to be eligible, you must have declared biology as your major and you must be a sophomore. The BioSEPC is a two year commitment (although you can study abroad) and entails various activities from planning picnics, conducting study breaks, and making t-shirts to conducting candidate and professor reviews. In addition, we act as student-faculty liaisons and regularly provide student input on professors, candidates, and the curriculum. Members must attend weekly BioSEPC meetings and periodically attend departmental meetings.

If you are interested in applying to be a member of the BioSEPC, then we ask you to please write a statement of intent. This entails a brief statement describing who you are and why you are interested in serving on the BioSEPC. Please post the statement on the BioSEPC board across from Professor Tricia Humphreys' office and send us a copy at [BioSEPC]. **Statements are due on April 15<sup>th</sup>.**

#### *Bio T-Shirts*

If you are interested in buying a 2007 Biology t-shirt then send \$12.00 cash to box #4490 with your name and size of t-shirt included. To see the design visit the BioSEPC board or look in the March issue of BioRhythms.

#### *Spring Biology Picnic*

The spring biology department picnic will be held outside of Noyce at the sundial on May 4<sup>th</sup>. A sign up sheet will be posted soon on the BioSEPC board outside of Professor Tricia Humphreys' office. Come and enjoy the spring weather and great company!

#### *Open Invitation to Biology Students*

Join us for our BioSEPC meetings on the second Monday of every month (April 9<sup>th</sup>) in SCI 1021 at 7pm. We would love to hear your input. Snacks will be available!

#### *Ideas?*

If you have ideas for how your BioSEPC can improve BioRhythms, please send them to us at [BioSEPC].

## Biology Comic of the Month

"YOU CAN ASSURE THEM THAT IRRADIATED AND GENETICALLY-MODIFIED FOODS ARE ALL PERFECTLY SAFE."

## Ali's Random Fact of the Month

Alien Hand Syndrome (AHS) is a real neurological disorder wherein a person's hand performs complex motor activities outside of volitional control!
