

# BIORHYTHMS

December 2008  
Volume 3 : Issue 4

## Upcoming Events

### **Study Break**

Come learn about off-campus summer research opportunities from other biology majors! It will be at 8pm on Thursday, December 4<sup>th</sup>, in Noyce 1612 (near the Psych department). There will milk and cookies!

### **Biology/Neuroscience Faculty Candidate Talks**

Monday, December 8<sup>th</sup> at 4:15 pm  
Friday, December 12<sup>th</sup> at 12pm

There will be two biology/neuroscience faculty candidates visiting campus to give presentations. Your opinion **really** matters to the hiring process! Please come tell us what you think about these candidates. Food will be provided.

### **Student Seminar**

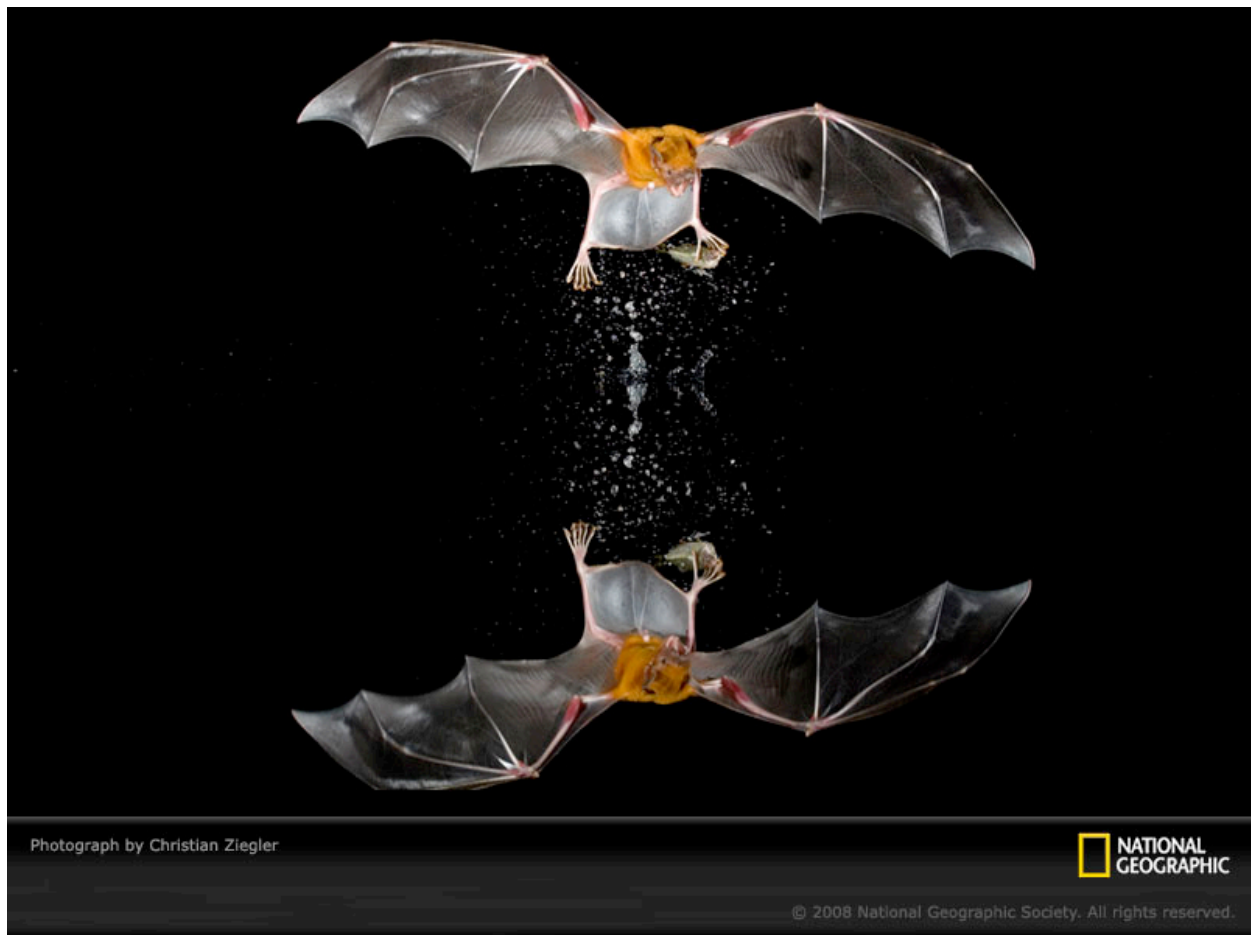

Come and support your biology peers!  
Friday, December 5<sup>th</sup> in Noyce 2021 at noon:

Anu Kramer and David Montgomery will talk about their complementary MAP projects done under Professor Eckhart last summer. Anu will focus on ecological niche modeling at the within-

population scale, and David will focus on ecological niche modeling at the population scale for *Clarkia xantiana* ssp. *xantiana*.

Anne Weeks will present “Does cAMP Receptor Protein Regulate Bioluminescence in *Vibrio fischeri*?” Her research was done with Dr. Eric Stabb at the University of Georgia.

## Random Creature of the Month

Photograph by Christian Ziegler

 NATIONAL  
GEOGRAPHIC

“Equipped with echolocation and gaffing claws, the greater bulldog bat of [Panama's Barro Colorado Island](#) can detect the hair-thin fin of a fish breaking the water's surface, a useful skill in a forest full of bat competitors.”

(Photo shot on assignment for, but not published in, "Winged Victors: Panama's Adaptable Bats," June 2007, *National Geographic* magazine)
