ITEM ACTION

- 1.0 The program for the Psychology department has not been developed to the extent of the other science departments. Changes in the curriculum and leaves of absence within the department have made it difficult to express the future needs of the department in square foot terms.
- 2.0 H&R requested that the department identify a set of spaces required to support each course offering, including section size, number of sections anticipated and teaching style. A future meeting will be scheduled to review the spaces identified.
- 3.0 The projected section size for general Psychology will be reduced from its current capacity of 90 students to three sections of 30 each.

The preceding notes constitute Holabird & Root's understanding of the matters addressed. If your understanding differs, please notify Dennis Vovos within five working days of your receipt of this document.
