

Windows VISTA VPN Client Installation

If the Cisco VPN software is not currently installed on your computer:

- Save "[GC_XP-VI_vpnclient_setup.msi](#)" to local computer.
- Double click on .msi file and follow installation instructions.

If you want to upgrade an existing VPN software installation:

- Using the Add/Remove programs control panel, remove Cisco VPN.
- Delete the folder C:\Program Files\Cisco Systems\VPN Client

****Use Caution to delete the correct folder****

- Install the new software using the above instructions.
