

# End-of-Course Student Ratings of Instruction

## College-wide (pooled) results over time

The following pages contain figures that summarize the quantitative results from student ratings of instruction at Grinnell College semester-over-semester.

The form currently in use was adopted by the faculty in the fall of 2000, and was intended to be used universally across all faculty members and courses at the College with the exception of independent study, guided reading, individual music instruction, and similar courses taught at Grinnell College. (Instructors teaching these latter types of courses may elect to use the standardized instrument at their own discretion.) The faculty-designed form became officially recognized for production purposes at the December 4, 2000 Meeting of the Faculty. As such, the results presented here start with the fall semester of 2000.

There have been few significant changes in the collection and reporting process over the years. The data were migrated from a series of spreadsheets to a database system in fall 2002, and both GIL and GIW started using the forms that semester as well.

The tallies presented here may differ slightly from the snapshot documents provided to instructors at the end of each semester. The information presented here comes from the dynamic dataset reflecting any corrections or late submissions.

The student rating form lists six statements to which the students are invited to respond:

1. The course sessions were conducted in a manner that helped me to understand the subject matter of the course.
2. The instructor helped me to understand the subject matter of the course.
3. Work completed with and/or discussions with other students in this course helped me to understand the subject matter of the course.
4. The oral and written work, tests, and/or other assignments helped me to understand the subject matter of the course.
5. Required readings or other course materials helped me to understand the subject matter of the course.
6. I learned a lot in this course.

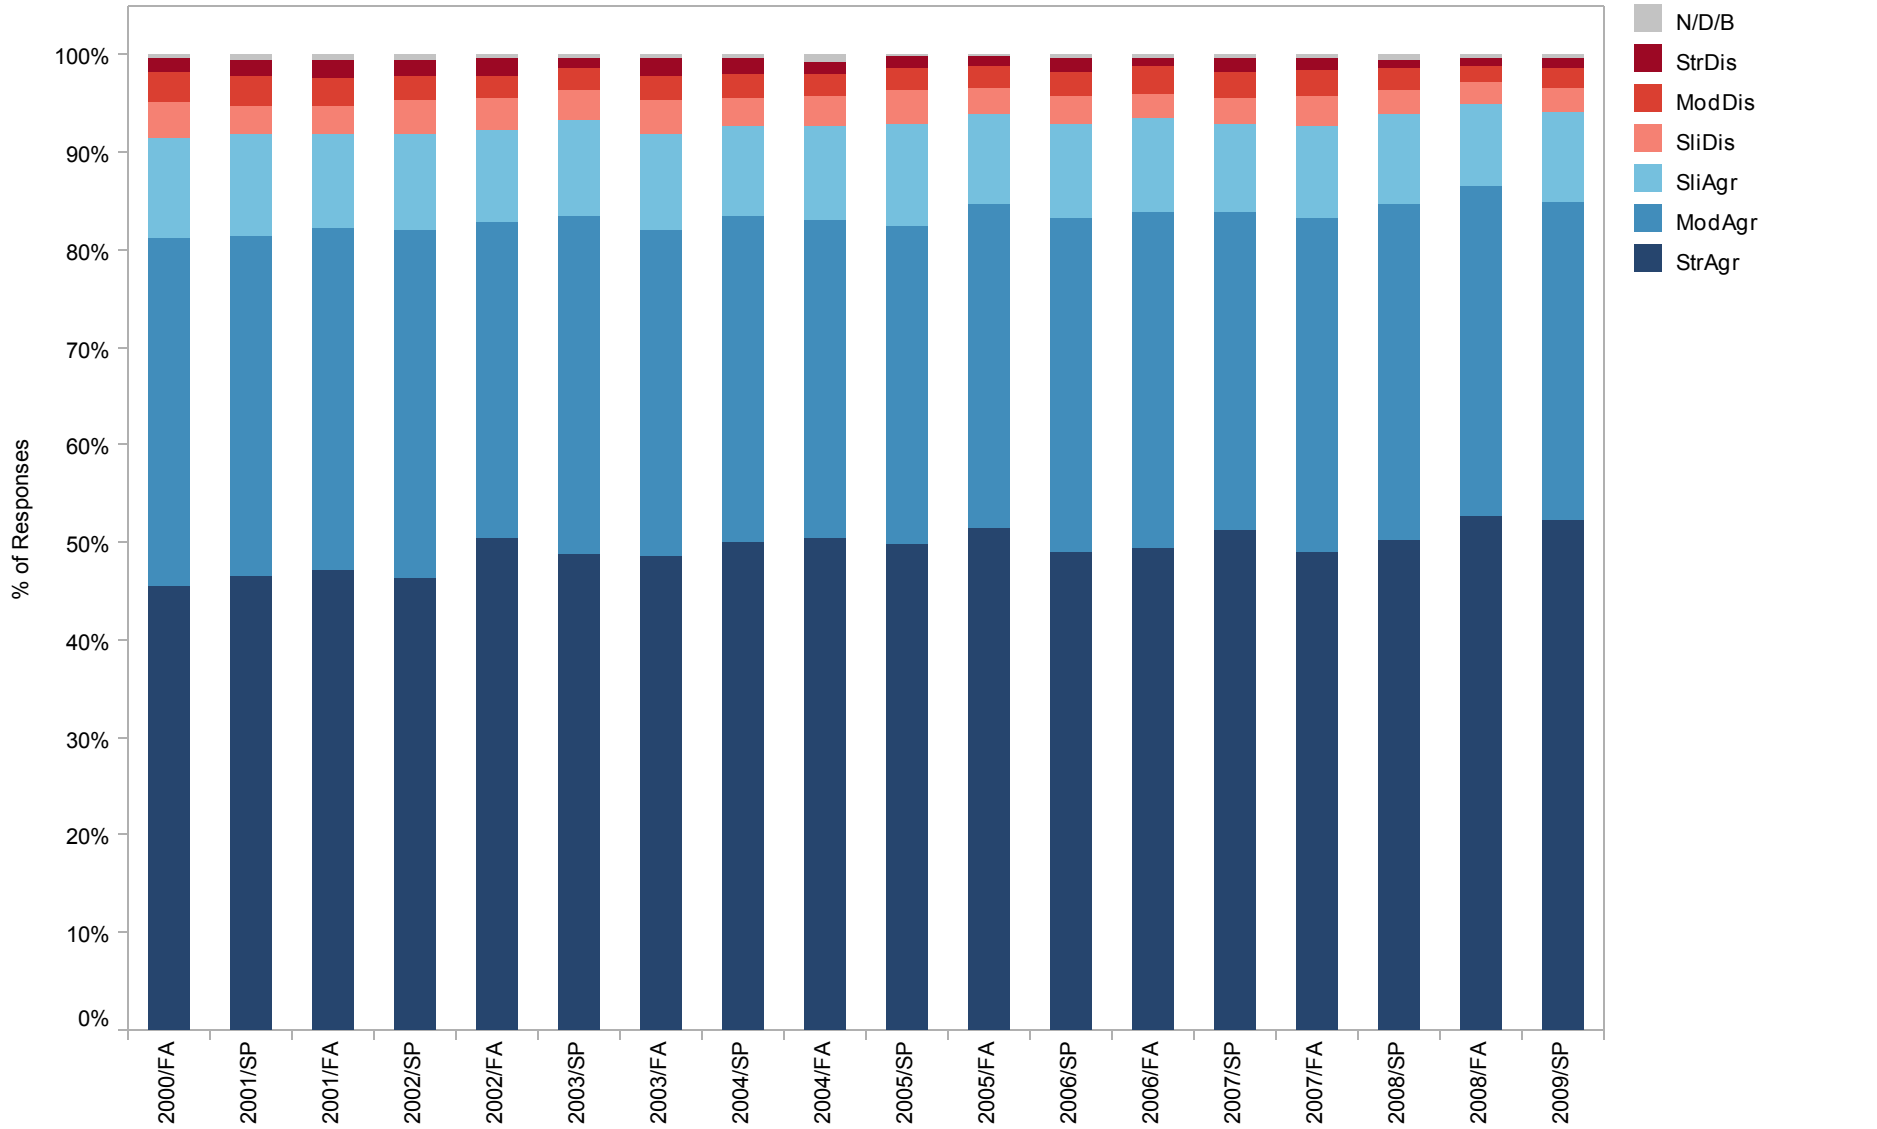

A response scale provides options for students to mark disagree strongly, disagree moderately, disagree slightly, agree slightly, agree moderately, agree strongly, or not applicable/don't know. Space is provided for written comments.

The following pages abbreviate the statements above as Q1-Q6 respectively, and the response categories as:

StrDis = strongly disagree  
ModDis = moderately disagree  
SliDis = slightly disagree  
SliAgr = slightly agree  
ModAgr = moderately agree  
StrAgr = strongly agree  
N/D/B = not applicable/don't know/blank

### Distribution of responses by term - Q1

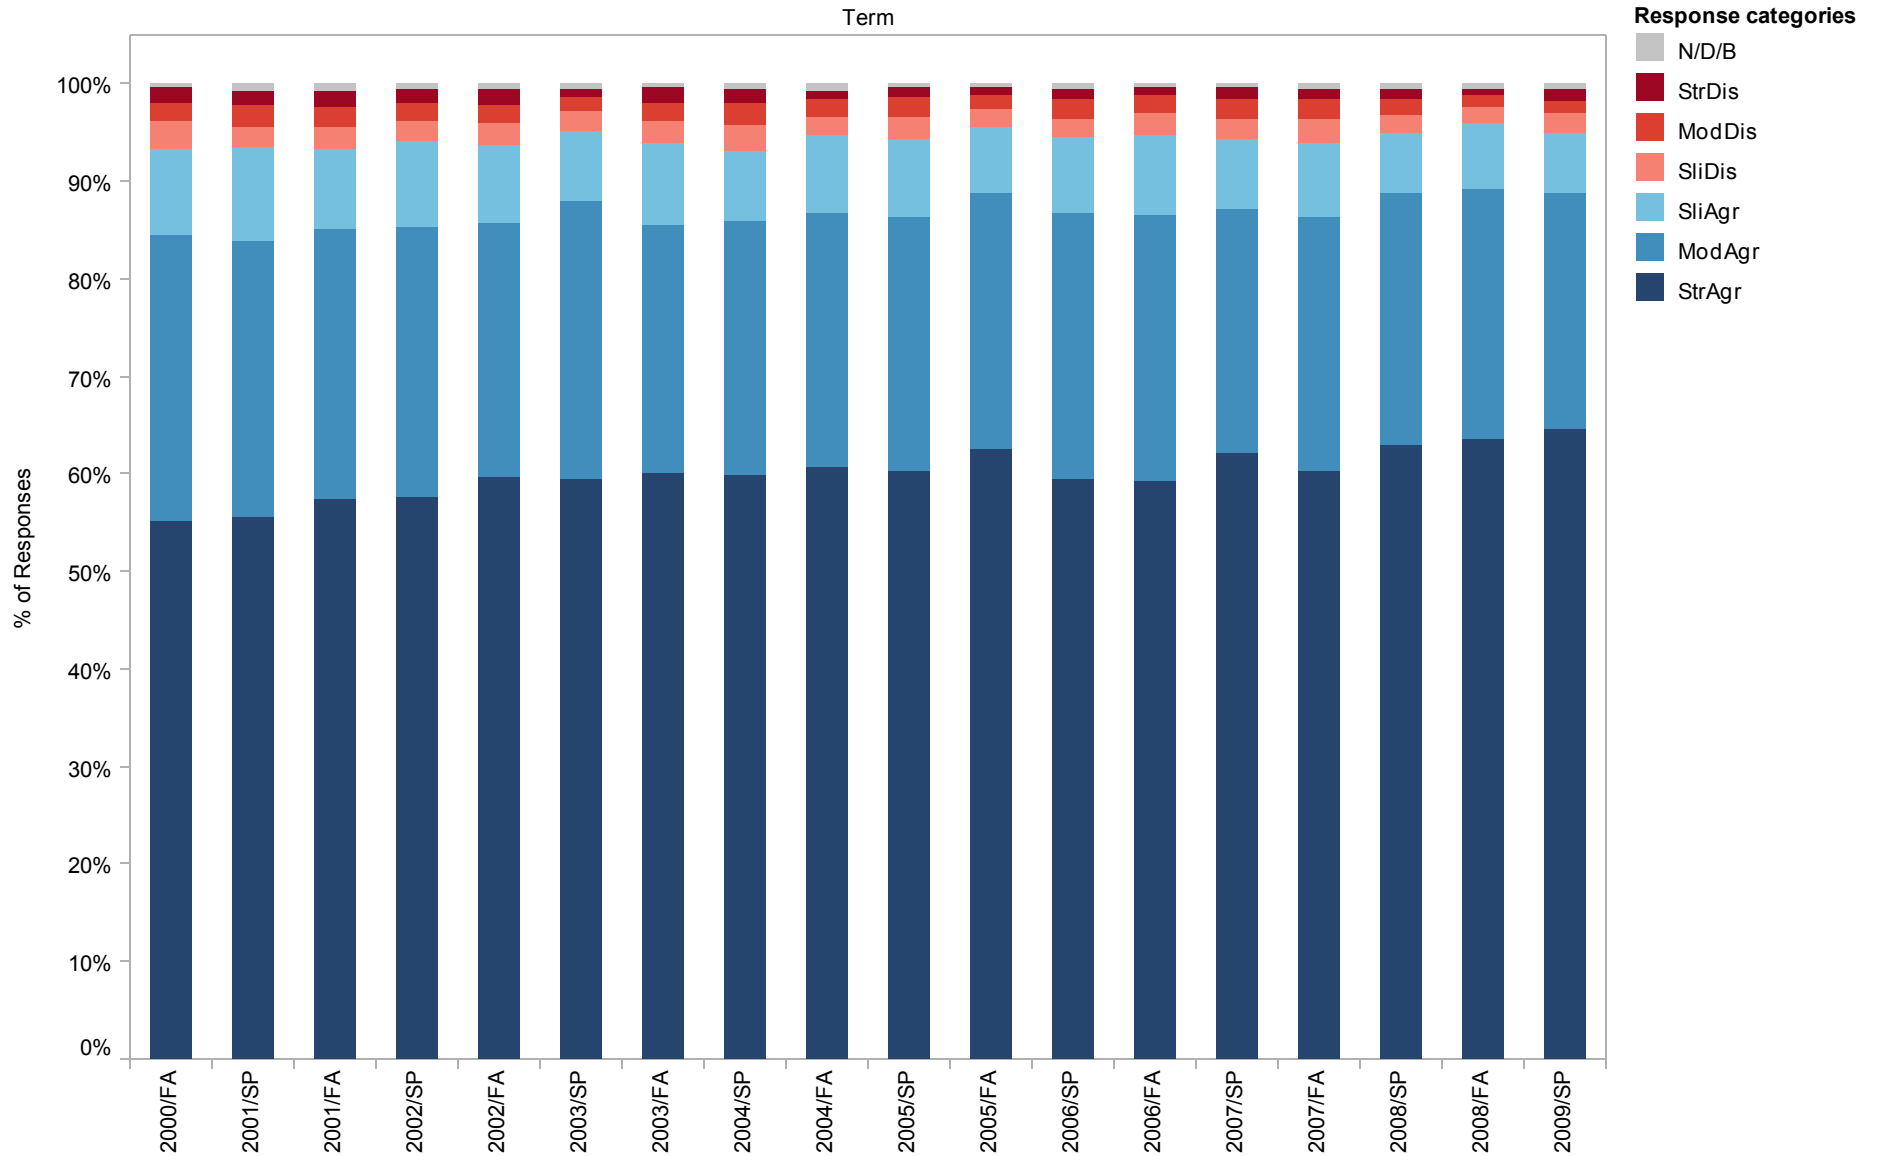

Term

Number of observations by response for each term, expressed as a percentage of each column total. Color shows details about response categories.

## Distribution of responses by term - Q2

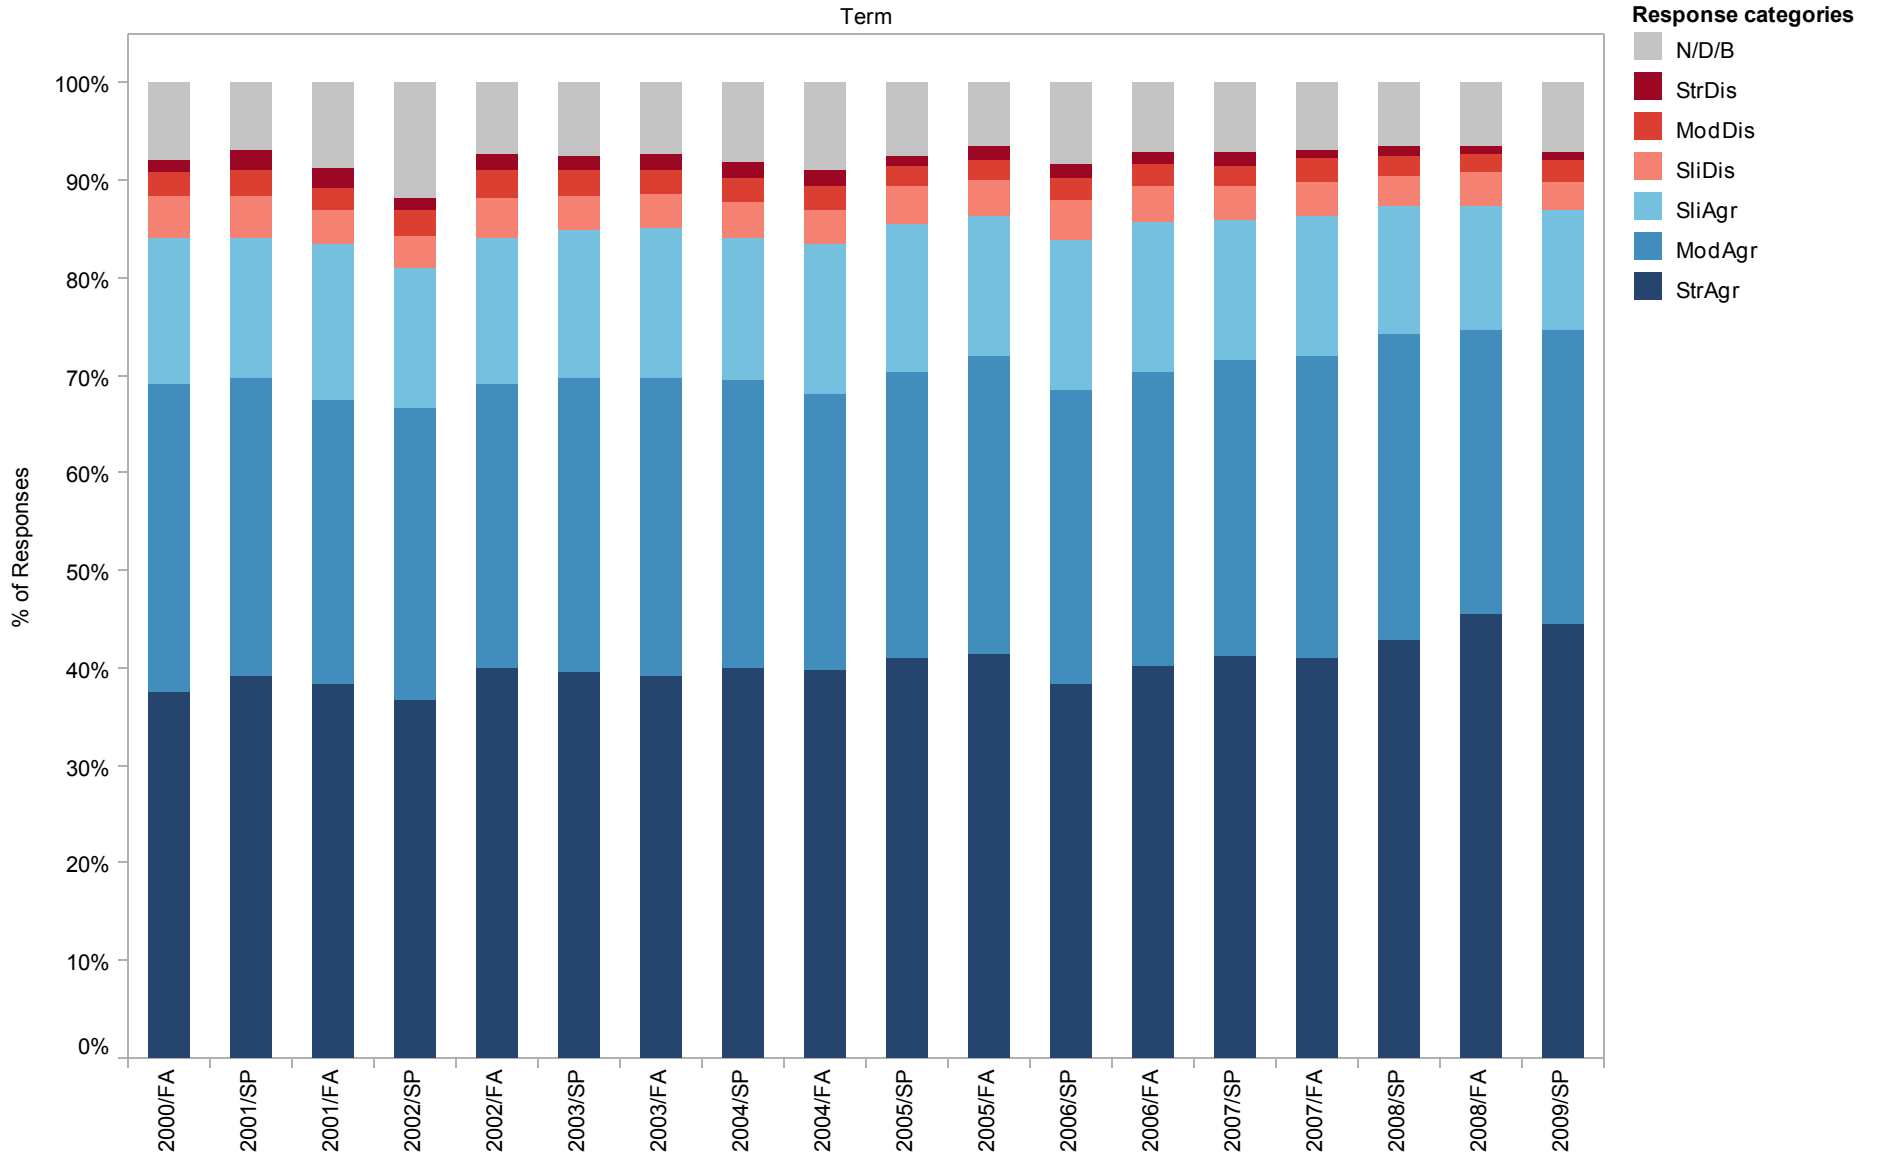

Term

Number of observations by response for each term, expressed as a percentage of each column total. Color shows details about response categories.

### Distribution of responses by term - Q3

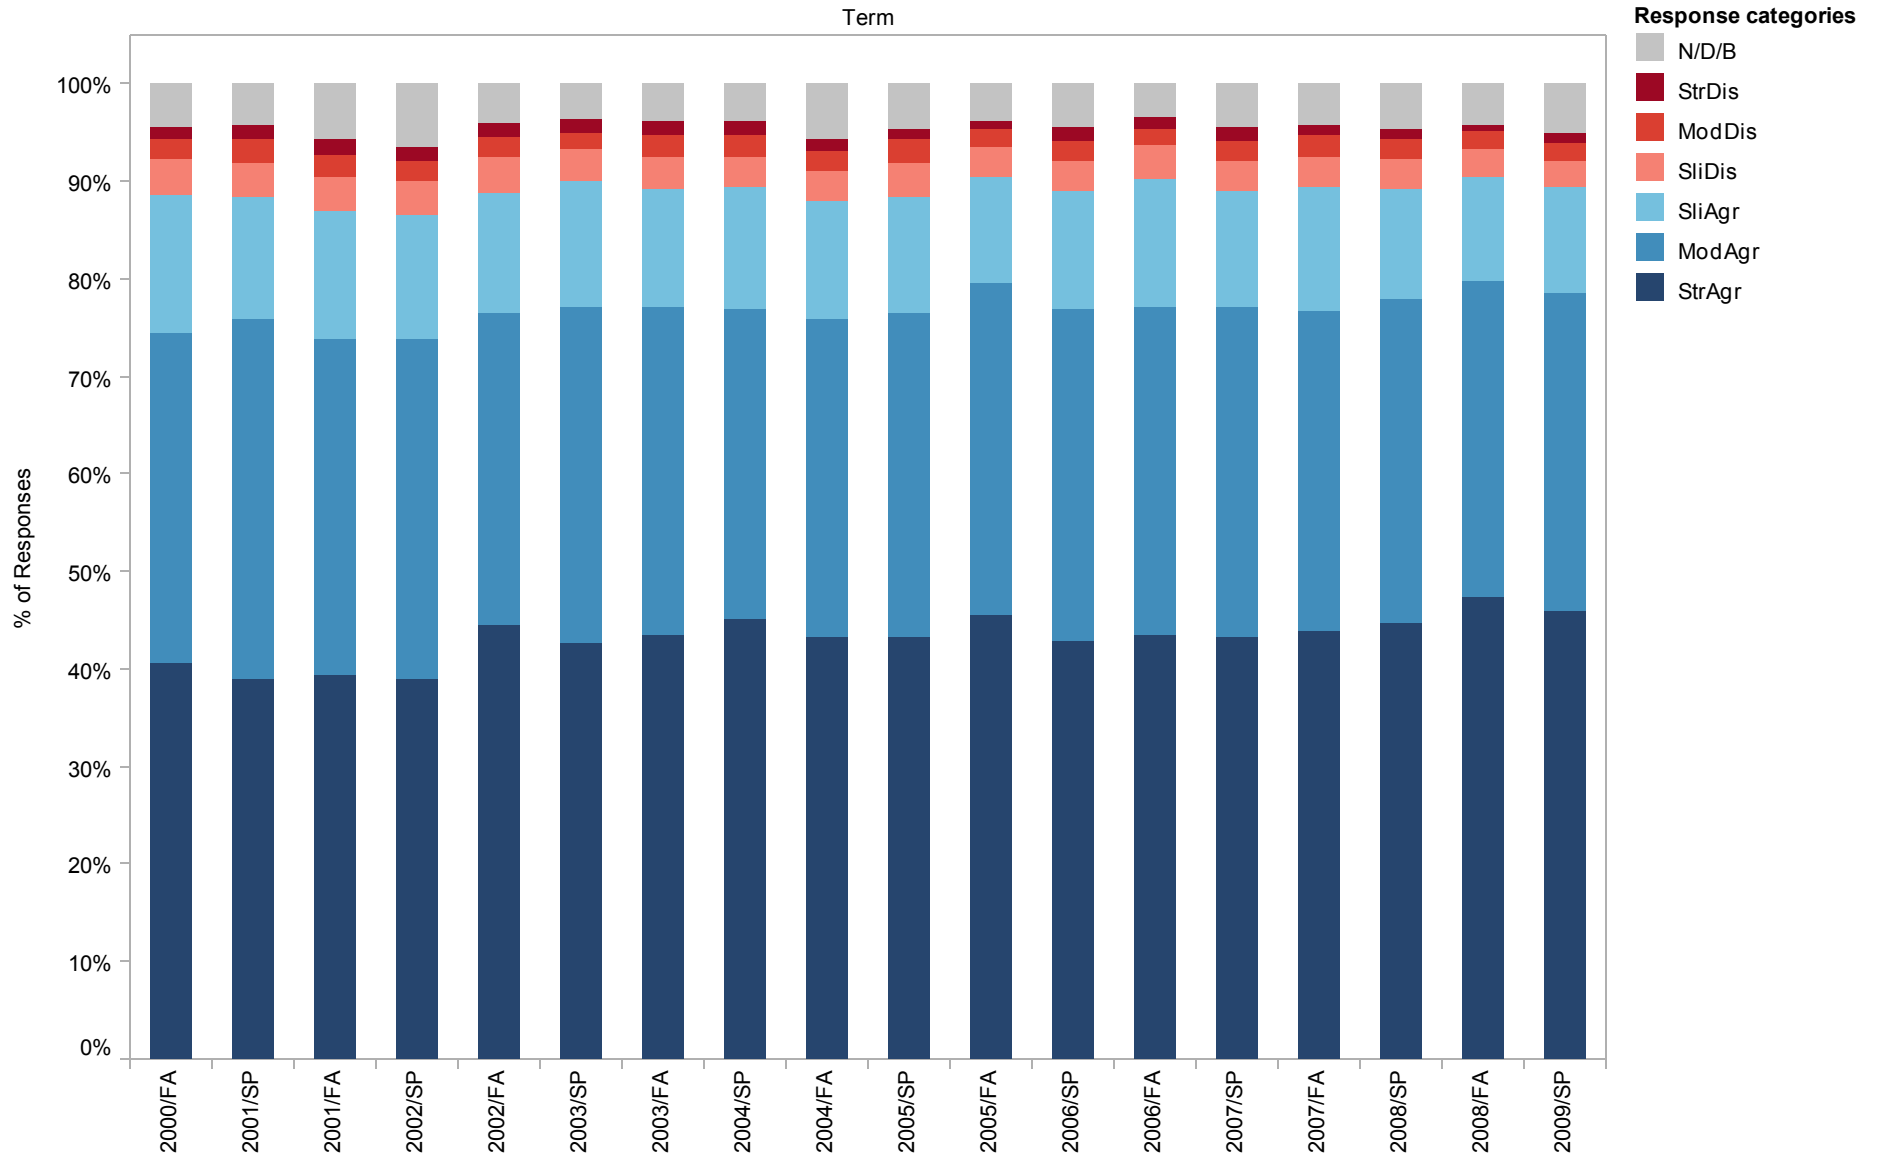

Term

Number of observations by response for each term, expressed as a percentage of each column total. Color shows details about response categories.

### Distribution of responses by term - Q4

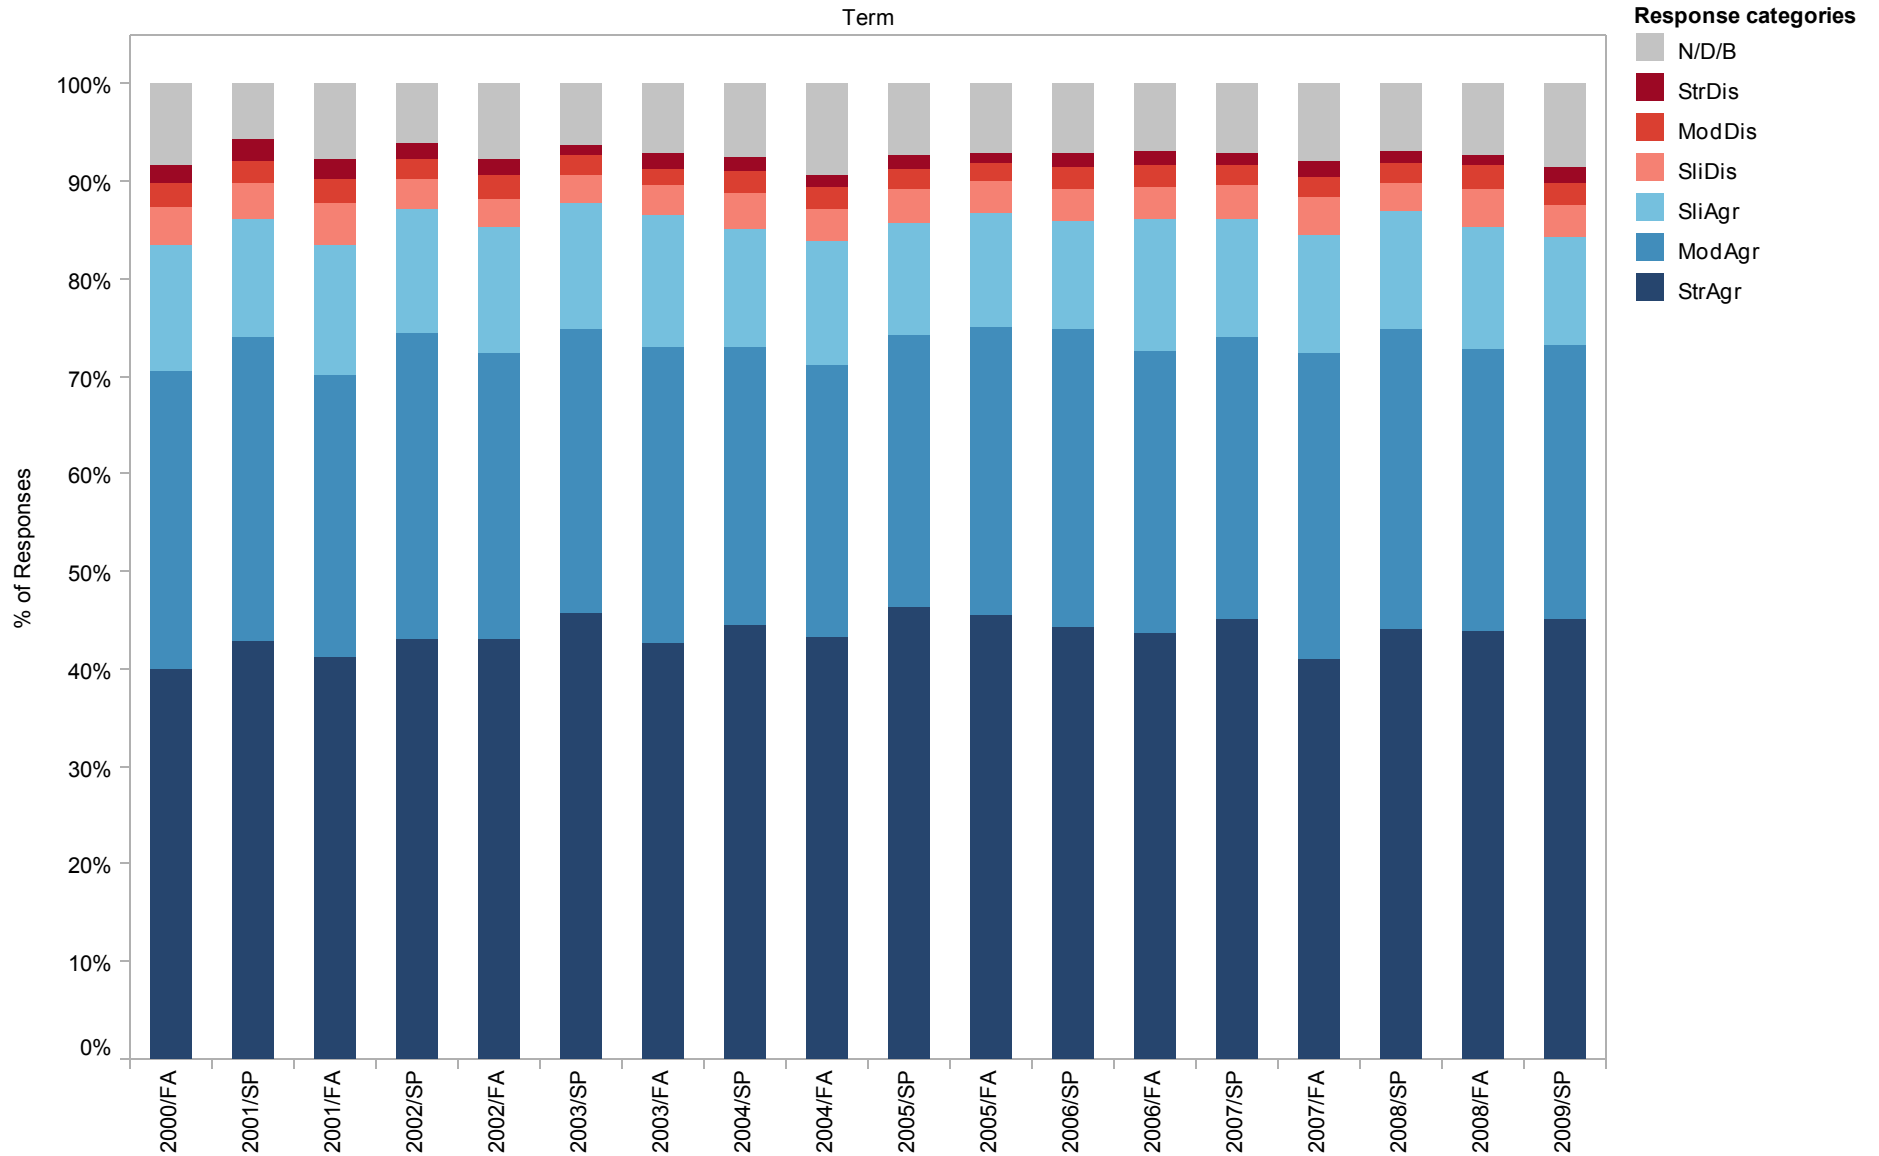

Term

Number of observations by response for each term, expressed as a percentage of each column total. Color shows details about response categories.

### Distribution of responses by term - Q5

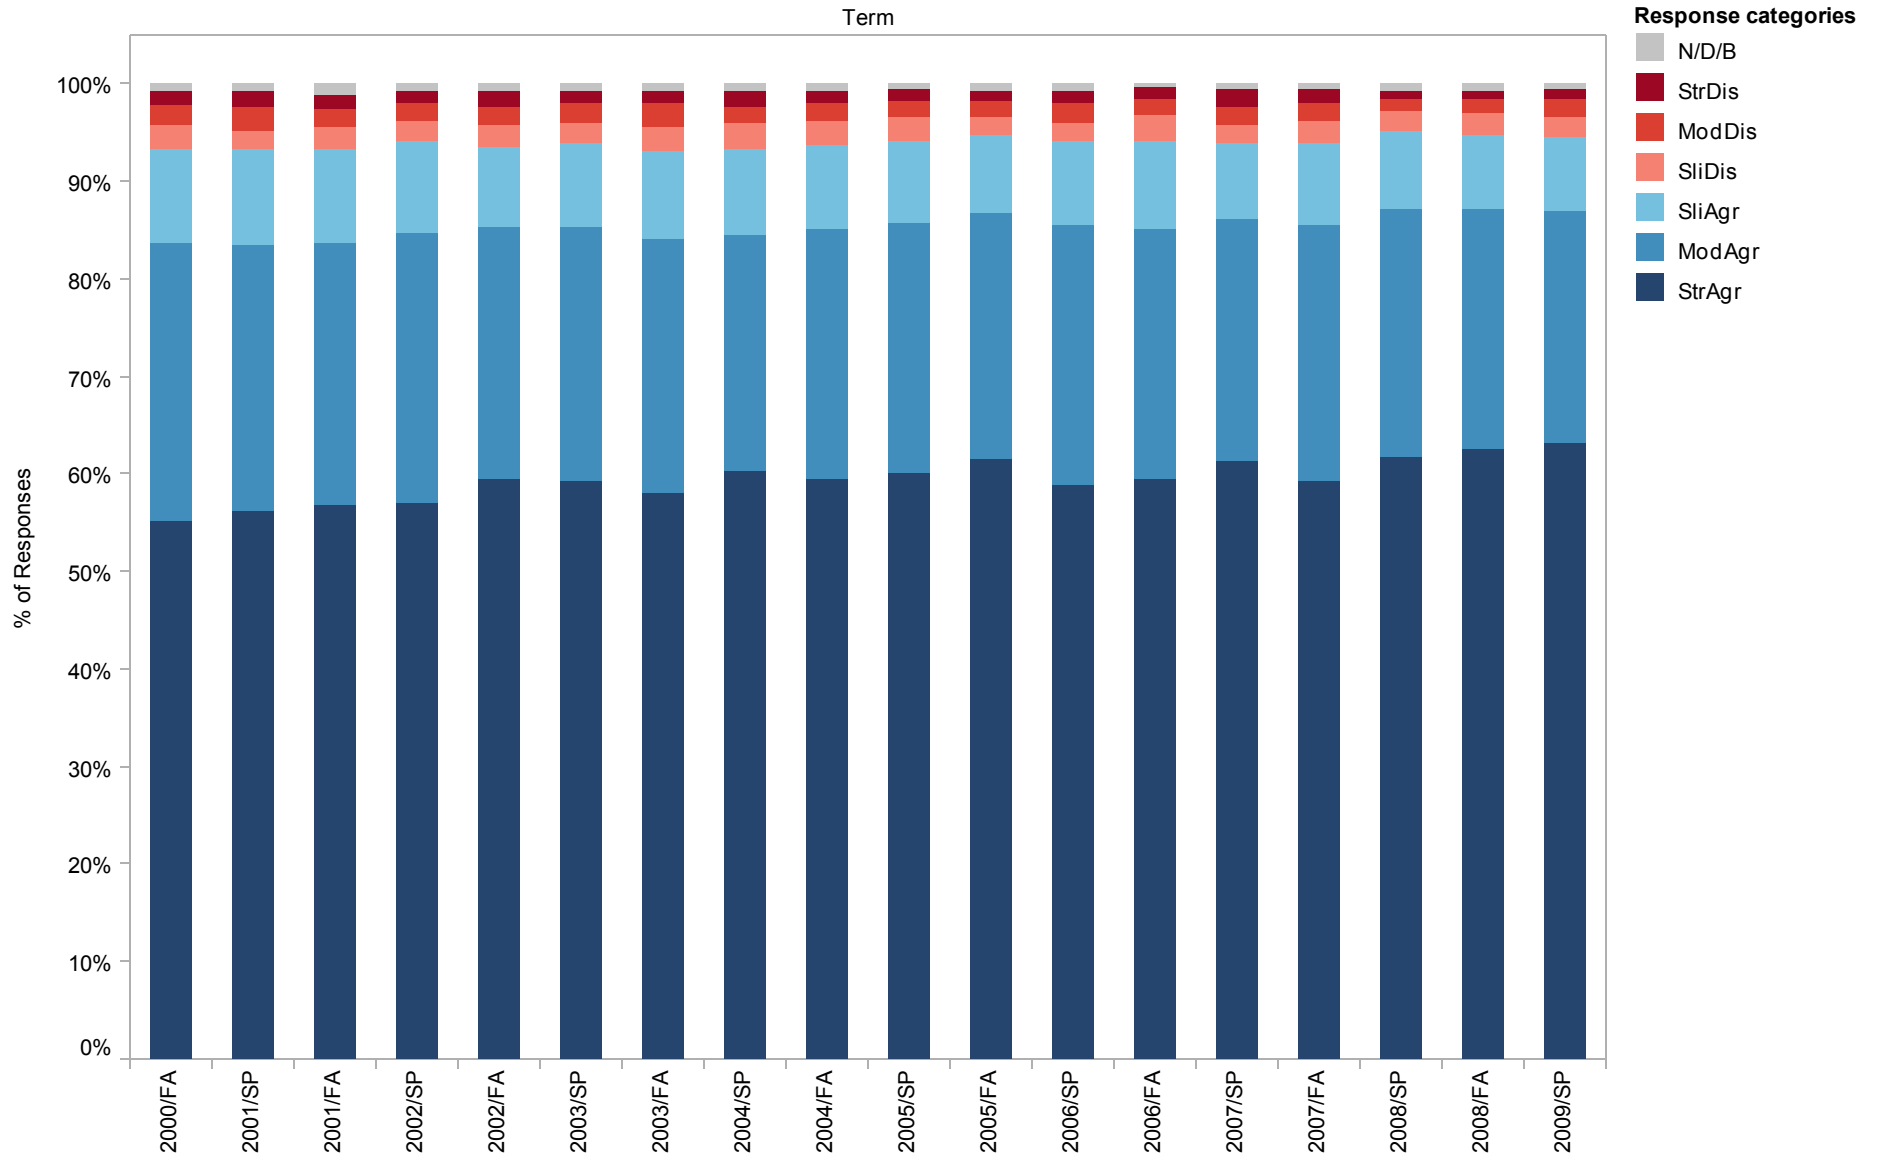

Term

Number of observations by response for each term, expressed as a percentage of each column total. Color shows details about response categories.

### Distribution of responses by term - Q6

Term

Number of observations by response for each term, expressed as a percentage of each column total. Color shows details about response categories.

### Frequencies by term - Q1
