If you find yourself stuck on what to write for a learning outcome, I recommend this easy-to-follow format:

1.) Review your mission statement;

2.) Find a word/concept/idea that illustrates what your department/program does;

3.) Plug that word in the last half of following sentence:

POSSIBLE FORMAT #1

As a result of participating in ________________________________

[insert activity or program name here]

students will learn ________________________________.

[paste language from your mission statement]

POSSIBLE FORMAT #2

Students will learn ________________________________

[paste language from your mission statement]

as a result of participating in ________________________________.

[insert activity or program name here]
